how to sync DB tables

Posted by snaf2k - 2011/07/25 22:14

---

for example I need to sync Adsmanager tables

right now I have 2 websites with different DBs, do I need to share the same DB to make it work?

The concept of JMS is based on the sharing and not on the synchronization that suppose that you duplicate the data.

So if you want to share the content of an extension, you can have a look in the tutorial video 16 for the concept.
http://www.jms2win.com/en/tutorial#jms12x-16

To check if the extension can be shared, see the list of extensions
http://www.jms2win.com/en/list-of-extensions?view=extlist&id=269&Itemid=53

Concerning AdsManager, it can be shared under Joomla 1.5.
We never received a version for Joomla 1.6 or 1.7.
