Frontend Edit Sites

Posted by buddyq - 2011/09/22 19:35

Hi Edwin,

I made a menu item for listing sites from the front-end. I can see the sites listed but there are a few issues with it:

- Does not display Prefix.
- Will not edit site if it is NOT listed on page one. So if there is pagination, and you go to page 2, or further, it will not edit the site. For example: If I list 50 sites on the page and am on page 1, I can edit #31. If I change to list 20 sites per page and go to page 2, it will not let me edit site #31.

Buddy

I will try reproducing it.

Can you give us info on JMS version and your joomla version.
