JMS, multisite for joomla - Joomla Multiple Sites and user sharing

See tutorial video 3

http://www.jms2win.com/en/tutorial#jms12x-3

and probably the installation from a directory when you server has limitation to upload large file (4MB) http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-from-directory In case of Joomla 1.6 or 1.7, you have to use the subdirectory _j16 to get the manifest file for the joomla 1.6 or 1.7
