PRESALE QUESTION: Virtuemart+jms share user points

Posted by vincenzo - 2011/11/30 11:05

Hello, I have a question. I would to create a network that in the master slave have alphauserpoints and in the second slave virtuemart. I'd like to share the user points in the second slave so my user can buy with the points grabbed in the master slave.

The domain map is
master slave: mysiteneme.tld
second slave: shop.mysitename.tld

Joomla version: 1.7.3

Can I use jms to do that?
I hope the question is clear.
Greetings

Yes I think you can effectivelly do that.

Concerning the Alpha User Point for Joomla 1.7, this may perhaps that we need the sharing like this is the case for joomla 1.5.
If you need the sharing of Alpha User Point, please send us the extension at the "contact us" email address to allow us reviewing it.

To see the list of extension that are currently defined in the JMS tool menu and the one that can be shared, see the link here
http://www.jms2win.com/en/list-of-extensions?view=extlist&id=269&Itemid=53
