_____

Here naturally, the CMS that we recommend is Joomla.

If your question concern the addional "wordpress" or "dromla" exention that can be installed on joomla, we have bot defined them in our JMS tool menu.
See the list of extension
http://www.jms2win.com/en/list-of-extensions?view=extlist&id=269&Itemid=53

Concerning Wordpress 3.0 on Joomla and JMS, we have compatibility issue reported to wordpress.
Wordpress Version 2.9 is working correctly.

Concerning "Droomla" we can just tell you that we defined it.
