Here naturally, the CMS that we recommend is Joomla.

If your question concerns the additional "WordPress" or "Droomla" extension that can be installed on Joomla, we have not defined them in our JMS tool menu.

See the list of extensions

Concerning WordPress 3.0 on Joomla and JMS, we have a compatibility issue reported to WordPress. WordPress Version 2.9 is working correctly.

Concerning "Droomla" we can just tell you that we defined it.
