How to create a new DB? Posted by lautes - 2012/03/27 11:23
Hello!
How to create a new DB for a slave site? I enter:  DB host: localhost  DB name: city  DB prefix: city_  DB user: root  DB password: (password is empty)
I click to "Save" and see an error: Database Error: Unable to connect to the database:Could not connect to database.
I open a file multisites.cfg.php and enter:  define( 'MULTISITES_DB_GRANT_HOST', 'localhost');  define( 'MULTISITES_DB_ROOT_USER', 'root');  define( 'MULTISITES_DB_ROOT_PSW', ");
Where is an error?  Or I have misunderstood also a database it is necessary to create independently through phpMyAdmin.

As the PSW is empty, if you have entered a PSW somewhere else, it will probably use the password your DB to copy or new DB to copy.
I suggest that you create a specific "root" user with a password.
