Error with slave site installation

Posted by ikho - 2013/07/16 14:50

Hi,

I'm using

Joomla Multi Sites version: 1.2.97 (Latest available: 1.2.97)
Patches definition version: 1.2.91 (Latest available: 1.2.91)

When I want to start the installation of the fresh slave site, I get the following error:

Warning: require(/homepages/36/d34964887/htdocs/master2012/includes/version.php): failed to open stream: No such file or directory in /homepages/36/d34964887/htdocs/master2012/installation/index.php on line 72

Fatal error: require(): Failed opening required '/homepages/36/d34964887/htdocs/master2012/includes/version.php' (include_path='.:/usr/lib/php6') in /homepages/36/d34964887/htdocs/master2012/installation/index.php on line 72

I've started with a Joomla 1.7.3 master installation and successfully started many slave site. Updates to 2.5.8 adn 2.5.11 worked very, very fine. Thank you very much!

But now I can't start a new fresh slave site. Are the updates the problem?

best regards - ikho!

The JMS 1.2.97 does NOT work on Joomla 2.5.10 or higher.

Joomla has modifed their installer and you need JMS 1.3.x to work on Joomla 2.5.10 or higher.

See the joomla bug tracker where we complain about that.
http://joomlacode.org/gf/project/joomla/tracker/?action=TrackerItemEdit&tracker_item_id=30206

and how change history
http://www.jms2win.com/en/faq/change-history-13x/367-joomlamultisite-1310-fix-joomla-2510
