Feeling like an Idiot!
Posted by my23rdwish - 2010/01/08 19:18

I have the user manual and have read back to front
I wish i could locate somewhere a step by step guide when it comes to setting up slave sites to the master site and how it works or an example. I have a master site and lots of sub sites each sub site as is it is now have their own separate login. and i would like to have a master login for all.
I just need a step by step guide if anyone out there can help!

Go in the tutorial and follow it step by step.
The video are created step by step.
Apply them step by step and try to reply to the question of each one before to go on the next step.

No there is no downloadable video and they can not be sent by email because they are too big.
