Menu sharing

Posted by godo - 2010/03/24 10:14

Hi to you all,

I am experiencing a problem when try to use menu sharing in my slave site.

When I select "Multi Sites Menu Item Bridge" then the Site "master" the followin error apear in the Select menu item "Unexpecte XML response Fatal error Class 'JFile' not found in ...administratorcomponentscom_multisiteslibraries/joomlajms2winfactory.php on line 178"

Help please

Regards

==========
