adding available keywords

Posted by muskes - 2010/04/11 20:16

Hello,

I want to add as keyword something like {user_username} instead of {user_id} or {site_alias}

Can you tell me how can I add this?

I want to add in Templates in the field "List of domain names" a syntax like this:

http://{user_username}.mydomain.com

...hope you can help me, its very urgent!

Best Regards

Muskes

This require to modify a source in JMS to program how to compute the keyword.
If you that we include this definition in a next JMS, we can do it with our billable support that you can order at
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1
