# Unable to install patches

Posted by mojara - 2010/05/06 23:43

---

when I try to check patches and then install them for the first time this is what I get.

Can someone please help?

* Unable to write entry
    * Error during installation of the file "administrator/includes/defines.php"
    * Copy failed
    * Copy failed
    * Copy failed

sounds like your file system rights are not set correctly. If this is a new installation in the test stage then why not open up all the file system rights and see that it patches correctly. Then immediately set the file system rights back to restrictive again.
