Create table error [1066]

Posted by jsohler - 2010/05/15 06:20

I got this error when I try to make slave site.

Create table error on query . DB Error: Not unique table/alias: 'it_acesef_extensions' SQL=CREATE TABLE IF NOT EXISTS it_acesef_extensions LIKE `skillsfo_skills`.`it_acesef_extensions`
Create table error on query . DB Error: Not unique table/alias: 'it_acesef_urls' SQL=CREATE TABLE IF NOT EXISTS it_acesef_urls LIKE `skillsfo_skills`.`it_acesef_urls`
Create table error on query . DB Error: Not unique table/alias: 'it_acesef_urls_moved' SQL=CREATE TABLE IF NOT EXISTS it_acesef_urls_moved LIKE `skillsfo_skills`.`it_acesef_urls_moved`
Create table error on query . DB Error: Not unique table/alias: 'it_alpha_rating' SQL=CREATE TABLE IF NOT EXISTS it_alpha_rating LIKE `skillsfo_skills`.`it_alpha_rating`

..... and so on for every table.

first I got this error says "MakeDB - DB Connection fail.WARNNOTCONNECTDB" then when I create a slave site and put new DB and USER.

Please help what this error mean..

Where is your new table prefix ?

It seems that you try replicate a website where existing table prefix is "it" into the same DB with the same table prefix "it".

When you replicate a website into the same DB, you have to provide different table prefix for each websites

Hi edwin2win;

I found this new error "Create User error : Query = , DB Message = "

do you have any idea why I came up with this error and possible solution in regards this problem please help..

_____

That mean that the user you provided were not present and that JMS has tried to create the user for you and it fails.
When the MySQL user that you provide is correct, Jms does not try to create it.
So provide a correct MySQL user.
