Pretty Basic Coding Question

Posted by DaveC - 2010/05/20 15:45

Hello

So I want to deploy the site as confirmed and I need the payment scripts for further processing tasks. I have quota and plenty of available slots. I have the following code in the Payment script menu item to give me a unique payment reference.

Now I want to change the status to 'Confirmed' at the time that the site deploys. I have the following code that is not working in On deploy success menu item.

Any tips on how to make this work?

Thanks in advance.
