

Deleting a Site

Posted by DaveC - 2010/06/06 01:49

Hello

Is it possible to delete a site with code?

Thanks

Dave

You can delete a site and its deployed directory.

In this case, this will delete everything.

So if you have put specific directories in the "deploy folder" they will be also removed.

Because if you have setup a slave site that has a location in a upper directory than your master.
This will delete everything including your master.
