Users Sharing

Posted by alvaradorichard - 2010/07/12 08:30

Hello i am new to JMS.

I want to have multiple sites that will have joomla and Virtuemart and other components, I just want to share the users between al the sites that i create. I do not care to share the other components.

I have read the manual up and down and it is too tecnical.

Please help, already sevarl days working on this. Almost giving up.

Perhaps you could start to try reproducing the procedure described in the tutorial video 16.

The configuration also depends on the MySQL privileges. Depending on your envrironment, you may need to increase the MySQL user privileges.

If you want that we setup your environment, this is also possible with our billable support that you can order at
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1

Hello:

I have tried several times to do this and end up frustrated. I will take your word on the assistance on installing this for me.

What do you need from me?

Should i install Joomla with virtuemart and have everything installed before?

basically what i need it to have multiple sores with different products each and different shopping carts, shared customers.

Just let me know what you need and i will do it.

Thanks,

Richard

If you want to install something, you can install Joomla and VirtueMart on a master website.
I suggest that you follow the architecture that is described in the tutorial video 0.b
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1

The effective time depends on the envirronment.
