# New and need help configuring

Posted by shaifful - 2010/08/11 18:50

---

Hi, my name is Shaifful and I've bought this component few days ago and since then try to config everything by myself and Unfortunately I've failed and I don't understand how to make this component work for me.

Can someone help me. Even the manual didn't help me at all..

---

Actually my problem lies from the beginning,

What I have done so far, I have created master site, and then after that I'm lost. Because I think that I don't really understand the manual itself.

My problem is to create a slave site, does it mean that I have to create separate db again as master and the original website?

Or does anyone here provide any installation / configuration with small fees? I'm just a newbie here. And my 1st language is not English.. and thats maybe the main reason why I don't really understand the manual.

Shafull, did you try to follow the tutorial.
In the tutorial, there are video that explain you the concept, how to install, how to create your first slave site.
http://www.jms2win.com/tutorial

If you have Symbolic Link allowed, you can try create your first slave site like presented in the tutorial video 9.
http://www.jms2win.com/tutorial#jms12x-9

Here it is a sample values:

* Site ID = slave1
* Domain name = {site_url}/multisites/{site_id}
* Deploy directory = {site_dir}

OK Symbolic link are there but which is the result of the simple website creation ?
If you want that we configure, setup, teachning you, ...., on your environment, this is possible with our billable support that you can order at
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1

wow that is too much pricey for me, getting your software was quite difficult, uuuhhh...
I think I couldnt bear this anymore, can I resell the component back?, giving back 100% software to the new user, with billable sites that I bought. For a much cheaper prices than I bought.. anyone want?
