Sharing tab doesn't show up in Template Setup

Posted by myathleticresume - 2010/08/17 07:41

I'm setting up a template following the instructions in tutorial 16. I'm not getting the Sharing tab to appear in my installation. I follow along with the tutorial exactly, and when I select the template site that I want to replicate (the step where the sharing tab appears in the tutorial) nothing happens.

Any ideas on what I could be doing wrong?

If the sharing tab is not show, this is probably because you are using MySQL 4.x and not MySQL 5.0 or higher.
Review your MySQL version.
The requirement is MySQL 5.0 or higher.
