Can't Login to Slave Sites

Posted by RandyF - 2011/01/31 18:41

I recently made some changes to my sites (I don't even recall what the changes were), but now I can't login to slave sites in the admin backend. I can get to the master site admin OK, but not to the slaves. Any suggestions?

I found my own answer again. In the Website Tools page, in the Master_DB ->Plugins, I selected User-Joomla and propagated to children. I guess I had messed that up somehow when I was working on the site.

Perhaps you have the same problem as describe here
http://www.jms2win.com/en/forum/26-bugs-errors-reporting/4701-backend-acess-problem#4708

If so, put in comment the line 530 in the application.php as show in the other post
