Settings of template (user sharing) are not saved

Posted by wilbert - 2012/03/23 10:37

_____

The settings as in attahcment arenot saved in the TEMPLATE!!
How come? and how to solve this.

I am using lateste version of multisites and user sharing.
I use firefox 11.0 as browser http://www.jms2win.com/images/fbfiles/images/2012_03_23_103545.jpg

_____

The settings are only saved when there is a DB to copy.
I suppose that you didn't selected any website to replicate.
So the sharing is not relevant in this case (as there is no sharing to do with NOTHING)

So check in the "common tab" that you have selected a website to replicate and for which you would like to share some content.
