Install Multisites on Joomla 2.5 for me for $25

Posted by pwwebdev - 2012/04/03 11:14

Can someony install JMS Multisites for me on Joomla 2.5? I keep getting errors while it worked fine on Joomla 1.5.

If someone can install it for me you get $25 via Paypal.

I get these errors (when I click on Install in the Check patches section)

JFolder::create: Infinite loop detected
Unable to create destination
Error during installation of the file "administrator/defines.php"
One or more backup file is missing. The original file(s) can not be restored.
