Extension for autoposting to Facebook

Posted by steinarasb - 2012/06/20 15:09

Hi.
In the list of compatible extension i couldn't find any extension for autoposting to Facebook.
Anyone know a extension that can be used?
I've been using Q Auto Facebook Joomla Plugin which does the job on a regular site, but I haven't tested this on JMS.

If this is a plugin, there is a very high chance that it is OK under JMS.
You probably also can just define it into a slave site with the JMS tool menu as it probably does not use specific mysql tables.
