

RSS Syndication

Posted by Zappu - 2010/04/13 09:28

I usually use the Ninja RSS - Syndicator (formaly known as the Brust Cancer Free Project Syndication soft) http://ninjaforge.com/index.php?option=com_ninjacentral&page=show_package&id=74&Itemid=245 to create the RSS feeds for a site, as these are much more flexible than the Joomla standard RSS syndication.

Is there any alternative which will work together with multisites available? If not, maybe you guys will create a patch so we can use this RSS syndicator?

Today, the standard Joomla RSS is working and used by some customers. Concerning the Ninja, we will review it.
