Error patches after install 1.2.92

Posted by tspbo622 - 2012/06/27 12:54

After Install 1.2.92 patching (needed?)
Following error messages appear:
JFolder::create: Endlosschleife erkannt
Das Ziel kann nicht erstellt werden!
Error during installation of the file "administrator/defines.php"

Joomla Multi Sites version: 1.2.92 (Latest available: 1.2.92)
Patches definition version: 1.2.86 (Latest available: 1.2.86)

This mean that you probably have a problem of permission to allow creating the files in that directory.

Verify the ownership of the files and folders.
Also verify the permission of the files and folder.

I highly suspect that you have your server that is using a owner "apache" or "nobody" to access the files and folders.
Perhaps you can try using the Joomla FTP Layer to use the FTP user to install the file.
