Bug: Widgetkit Edits Not Saving

Posted by bonfiresalomon - 2012/06/28 21:12

Hello,

I am having issues with saving edits to Widgetkit widgets; specifically the content within slideshows (using the native widgetkit editor, not pulling from ZOO or Joomla articles). I can save changes to the slide's 'title' and 'navigation' but nothing to the content. I can create new slides and delete others but I cannot save changes to the content of any given slide.

I'm using the latest available version of widgetkit (6/28) and the latest versions of JMS and JMS Warp patches. All the patches are reported installed correctly and the warp patch plugin is enabled. I've tried uninstalling/reinstalling/etc. widgetkit with no success.

SOLVED: Bug: Widgetkit Edits Not Saving

Posted by bonfiresalomon - 2012/06/28 21:25

The bug was caused by JCE Editor within Widgetkit and not JMS.

Updating to the latest JCE version resolved the issue.
