Jomsocial photo comment give "404" page

Posted by bbr170 - 2012/09/28 16:45

Good day I hope all is well,

I have been trying create a slave sites with Jomsocial as one of the compontent installed on the master and every time I create a slave the comment on a photo goes to a "404" page if I click on the image in the community front page activity steam.

Let me explain:

master is at www.mysite.com
slave1 is at slave1.mysite.com
slave2 is at slave2.mysite.com
slave3 is at slave3.mysite.com

now if I add a photo to slave2 it will show up on all the site just fine, but if I make a comment on that photo from slave1 it puts that activity into the home page of the community just fine just like I would like. Now if I go to slave3 and click on the photo in the community home page activity steam I get a "404" page. I do not know what I have been doing wrong but it is driving me nuts....

Recap

slave2: upload photo

slave1: post comment

slave3: "404" page when I click on the thumbnail in the community home page activity stream.
http://www.jms2win.com/images/fbfiles/images/Activity_Stream_404.png

Thanks so much for any advice I have been working on this for 3 weeks and I and going NUTS!

Thanks

I suggest that you report this issue to JomSocial.
I suspect that there is an error in the link attached to image.
