Fatal error: Class 'MultisitesController' notfound

Posted by jsohler - 2009/09/02 09:21

Im getting this error when i uninstall the jms component.

Fatal error: Class 'MultisitesController' not found in /home/foodtabs/public_html/administrator/components/com_multisites/patches/joomla/check_jms_vers.php on line 37

Joomla Multi Sites version: 1.2.0 RC4
Joomla 1.5.11

Please Help

Is there a file missing?

I need to upgrade the jms

Sorry i did post this to wrong forum category, so ill post on the right one...

Thanks,

==========

Maybe you should effectivelly update your JMS.
The latest version is JMS 1.2.4.
See the FAQ for the procedure to get the latest version
http://www.jms2win.com/faq#sec-122

Yes, i need effectively update/upgrade the JMS on my site, but i can't update/upgrade because i can't uninstalling the old version "Joomla Multi Sites version: 1.2.0 RC4"... because of the error saying:

Fatal error: Class 'MultisitesController' not found in /home/foodtabs/public_html/administrator/components/com_multisites/patches/joomla/check_jms_vers.php on line 37

How can i fix these? problem...

I need to upgrade into The latest version is JMS 1.2.4.

Thanks,

_____

If you have downloaded the latest version (now JMS 1.2.5), you can install it directly with joomla / install.

Of course you can have this error because you have not installed the newer JMS version.
Apply the joomla / install procedure.

_____

Did you get what im talking about?

Ok

Here is the scenario:

1. I install the "Joomla Multi Sites version: 1.2.0 RC4" and its exist now on the site.

2. I need to uninstall this old version because i need to update you latest JMS version.

3. Now, the problem when i uninstall the old version(Joomla Multi Sites version: 1.2.0 RC4) that exist on my site right now is having problem and get of error saying: "
Fatal error: Class 'MultisitesController' not found in /home/foodtabs/public_html/administrator/components/com_multisites/patches/joomla/check_jms_vers.php on line 37"

4. How can i install the new version of JMS since its have old one exist on my site?

Thanks,

==========

_____

Your scenario is wrong and does not correspond to my reply.
You don't have to do the point 2.
Do not try to uninstall JMS.

Directly install JMS 1.2.5 over the existing one.

JMS can be installed as fresh or as update.
