can't execute actions under tools
Posted by aasheesh - 2010/02/06 17:59

Hi,

I'm trying to install components/modules/plugins in slave site using tools menu.

But when i hit execute the status shows "x".

I have checked ad rechecked everything, but can't find the issue. I have another install of multisite and it functions correctly.

Joomla: 1.5.15
Joomla Multi Sites version: 1.2.20
Patches definition version: 1.2.26

thanks in advance.

Which extension do you try to install (the exact name).
Have you checked if this extension is defined in the JMS tools.

I can't install any extension.

Mysql 5.0.45
Php 5.2.9
sharing enabled in DB
symbolic links enabled

Which error message you received.
Have you checked that you have MySQL user permission.

If you can not install the extension with the JMS tool, you can always go in each slave site and re-install the extensions.
Perhaps you will see an error message that will help you know what is wrong in your installation.

If you want that we have a look on your server, we also have billable support that you can order at http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1
