Execute Actions... Red, X but says "OK"

Posted by jrosenbaum - 2010/03/29 21:29

I remember it used to not have this issue.

When I execute a change in the multisites, it shows up this way.
Status (red x)

- in red

Now I've been having permission issues with the people that are hosting the site.

Can you give a screenshot, I don't see which read X you means.
Is it in the JMS tools components ?
In the title of the post, I suppose this is after your try install, Uninstall, share something
