Db error on creation of slave site Posted by miami - 2010/04/26 04:39
All's working well with our slave sites, and I wanted to create a new slave, with the same Website Template, but with a different DB prefix, in this case, indl
Error I am getting back is:
Error(1) query . DB Error: CREATE VIEW command denied to user 'induguia_jo151'@'localhost' for table 'indl_users' SQL=CREATE OR REPLACE VIEW indl_users AS SELECT * FROM `induguia_jo151`.`master_users` etc.
Why?
Re: Db error on creation of slave site Posted by edwin2win - 2010/04/26 08:20
You will find plenty answers in this forum. Always the same reason for "command denied" http://www.jms2win.com/forum/search?q=command+denied+to+user
You have to increase the privileges of your MySQL user to add "create and show view". Also explained in the tutorial video CP-02 and in 0.b - slide 35 http://www.jms2win.com/tutorial#jms12x-0b http://www.jms2win.com/tutorial#jms12x-CP-02

Re: Db error on creation of slave site Posted by miami - 2010/04/26 20:40
Yup, that's it "create views, show views" on Cpanel.
Re: Db error on creation of slave site Posted by edwin2win - 2010/04/26 21:44

cPanel does NOT provide this facility.

If you are using a shared hosting, you have to contact the support to grant your user.

If you have a dedicated server of have the "root" PHPMyAdmin, you can do it yourself.
