Registerd Users can view all sites after update

Posted by DaveC - 2010/06/19 03:11

Hello

I think I may have found a bug after updating to the following:

Joomla Multi Sites version: 1.2.31 (Latest available: 1.2.31)
Patches definition version: 1.2.37 (Latest available: 1.2.37)

Before when a registered user logged to the front end they could only see the sites that they own, now they can see all sites (including the template sites).

When you select one you do not own you get the following: Sorry, we can not display this record because it is not attached to your user account

I will try reproduce it.

I am able to reproduce it and the fix will be available in the next JMS Multisites 1.2.32.

Thanks Edwin,

I can confirm this is fixed in the latest version.
