New Slave site Error

Posted by Sison - 2011/01/08 15:31

---

i just installed JMS and trying to create my first slave site

I followed the instructions from here step by step:
http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-overview/index.html

I successfully created a template and proceed to creating the new site as in the demo

after i click on save, i got this message
"Unable to create the symbolic link -> ."
but the status on page is confirmed and pretty much same as the demo

i then check if it saved the file on the server
ll slave1/
total 100
lrwxrwxrwx 1 apache apache 58 Jan 8 21:49 administrator -> /slave1/administrator
drwxr-xr-x 2 apache apache 4096 Jan 8 21:49 cache
lrwxrwxrwx 1 apache apache 55 Jan 8 21:49 components -> /slave1/components
-rw-r--r-- 1 apache apache 2773 Jan 8 21:49 htaccess.txt
lrwxrwxrwx 1 apache apache 51 Jan 8 21:49 images -> /slave1/images
lrwxrwxrwx 1 apache apache 53 Jan 8 21:49 includes -> /slave1/includes
-rw-r--r-- 1 apache apache 492 Jan 8 21:50 index2.php
-rw-r--r-- 1 apache apache 490 Jan 8 21:50 index.php
drwxr-xr-x 2 apache apache 4096 Jan 8 21:49 installation
lrwxrwxrwx 1 apache apache 51 Jan 8 21:49 joomla -> /slave1/joomla
lrwxrwxrwx 1 apache apache 53 Jan 8 21:49 language -> /slave1/language
lrwxrwxrwx 1 apache apache 54 Jan 8 21:49 libraries -> /slave1/libraries
drwxr-xr-x 2 apache apache 4096 Jan 8 21:49 logs
lrwxrwxrwx 1 apache apache 50 Jan 8 21:49 media -> /slave1/media
lrwxrwxrwx 1 apache apache 52 Jan 8 21:49 modules -> /slave1/modules
lrwxrwxrwx 1 apache apache 55 Jan 8 21:49 multisites -> /slave1/multisites
lrwxrwxrwx 1 apache apache 52 Jan 8 21:49 plugins -> /slave1/plugins
-rw-r--r-- 1 apache apache 319 Jan 8 21:49 robots.txt
drwxr-xr-x 7 apache apache 4096 Jan 8 21:49 templates
drwxr-xr-x 2 apache apache 4096 Jan 8 21:49 tmp
lrwxrwxrwx 1 apache apache 51 Jan 8 21:49 xmlrpc -> /slave1/xmlrpc

And yes it does but when i proceed to the browser for slave installation
i get this on root domain:
No configuration file found and no installation code available. Exiting...

if i try the domain.com/installation

If you have an error reported by JMS Multisites when creating the slave site, this is normal that it does not succeed finally.

The question is why you have all these error messsages.

One of the reason is that all the directories was already created (physically or with a symbolic link that is different).
So recheck the deploy directory and verify that all the directories correspond to the expected symbolic links that are reported by JMS Multisites. Probably you have different path or that you have physical directory instead of a link.
