# There was an error uploading this file to the serv

Posted by urbanguru - 2011/01/29 09:56

---

Hey Edwin,

I just downloaded JMS Multisite and I'm unable to install it. I get this message: "There was an error uploading this file to the server." I naturally thought it was a problem on my host server and gave them a call. They reset the server and I'm still getting the message. Do you know what could be causing this?

JMS Multisites is a package that is more than 2.7MB.
Perhaps you server is limited to 2MB or less.

If this is the case, you perhaps have to try increasing the upload max size or install from a directory.
See here another post that explain how to do that.

OK, I'll give it a shot, but I've already set the server to accept files up to 100MB. I'll let you know if this method works for me.

(Update: OK. It did work. Thank you for your help.)
