error installing patches

Posted by h4nneke - 2011/03/11 18:02

I installed Multi Sites successfully, but when I try to install the patches, I got this error:

Fatal error: Allowed memory size of 20971520 bytes exhausted (tried to allocate 2367489 bytes) in /home/user/domains/mydomain.org/public_html/libraries/joomla/utilities/buffer.php on line 66

Can anyone tell me what to do?

Check the PHP memory parameter.
Perhaps you have 32MB or less.

So check the memory_limit parameter and increase its value.
Most of hosting provider have a 64MB or more.
