Generated: 1 August, 2025, 10:16 error installing patches Posted by h4nneke - 2011/03/11 18:02 I installed Multi Sites successfully, but when I try to install the patches, I got this error: Fatal error: Allowed memory size of 20971520 bytes exhausted (tried to allocate 2367489 bytes) in /home/user/domains/mydomain.org/public_html/libraries/joomla/utilities/buffer.php on line 66 Can anyone tell me what to do? Re: error installing patches Posted by edwin2win - 2011/03/12 14:02 Check the PHP memory parameter. Perhaps you have 32MB or less.

JMS, multisite for joomla - Joomla Multiple Sites and user sharing

So check the memory_limit parameter and increase its value.

Most of hosting provider have a 64MB or more.
