# Cannot log into Master Site backend

Posted by netd - 2012/01/08 13:21

---

Attempting to log into Master Site backend just reloads the login page. Logging in to each Slave Site backend works okay.

Joomla Version 1.5.22
Joomla Multisites Version 1.2.40
Patches Definition Version 1.2.46

I cannot update the JMS version from the slave site.

Have checked the cookie domain - PHP Info available at arkay-imaging.com/test.php

Please ignore - appears to have been a conflict with FF - updated FF and cleared cache - problem resolved.
