My host can't seem to fix create view issue

Posted by dda - 2012/02/23 05:31

I have the create view user issue on my Cpanel managed server. I've asked the hosting provider to fix it twice but they can't seem to do it.

Is there anything I can do in phpmyadmin to get it working? (I suspect there isn't since I can't alter the user privileges in phpmyadmin but I'm an getting desperate!)

See the tutorial video 0.b slide 35.

We show how your hosting provider can fix that with the PHP MyAdmin.
This require a MySQL root login.
