In which context did you get this error.
Please describe the scenario.

If you have the "error building admin menu" during the install of JMS, this might be the symptom that you had a problem to upload the package or that you had a problem of permission somewhere.
In this case, you have to un-install JMS and re-install it.

See also the video 3 that show an alternate solution to install JMS from a directory
http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-from-directory
