Possible to sell subscription to slave sites?

Posted by sjkelley - 2016/07/06 19:31

Hello,

I have 3 different website designs that I'd like to sell on a subscription basis to customers. So if I had three master sites, say at...

http://mydomain.com/design1
http://mydomain.com/design2
http://mydomain.com/design3

... Can JMS be used in conjunction with HikaShop (or another cart system) to charge a recurring monthly bill for the creation of a slave site based on one of the 3 designs?

Yes you can do that.
What you are describing is what you can see at www.mywebsite2win.com

We recommend that you use subdomain instead of subdirectories for SEO reason.
You will need the JMS Full edition.
To process the payment, you will need the "Bridge for HikaShop" and website quota.
