## JMS, multisite for joomla - Joomla Multiple Sites and user sharing

Generated: 14 August, 2025, 19:35

Several sites.	different templates, same db content
Posted by guilhermey	

## Hi!

This is the intended architecture for our project:

- several different websites
- different subdomains under a same domain
- same database content (users, content, etc)
- different templates (one for each website).

Do you have an extension that can help?

Tks a lot!
