Easyblog - cannot follow read more links Posted by jamesd256 - 2013/09/24 17:05
Hi,
We have created a slave site with a new DB prefix, re-installed Easyblog, and find that the 'read more' links get redirected to a 404.
We also tried without re-installing Easyblog. These links all work fine on the master site.
Thanks,
James
