Problem with JCE editor

Posted by timstohr - 2016/03/20 10:13

Hey,
I have a problem with the JCE editor. The symbols on the editor have disappeared on my slave sites (see attached picture). How can I resolve this?

I have identified the problem. It has to do with the icons being looked for in a completely different path then is normal. It should not add the berlin.international-friends.net/www/var/xxx/master/ etc...

See attached link since I cannot upload pictures:

When using JCE, disable the JCE compression or cache in the slave site adn the icon will be displayed.
This is a bug in JCE that you could potentially report to them.
They have a problem in the compression or cache in JCE.
So go in the JCE back-end and disable the cache / compression.
