List of compatible extensions
Posted by B93 - 2010/06/23 13:50

Hi Edwin,

I remember having seen a list of extensions compatible with jms. Have not been able to find it again. Could you send me a direct link if such a list still exists?

Best regards,
Klaas Muizelaar

You just have to click the "help" button in the "JMS Tools" menu.
This will redirect you to this site at the link
http://www.jms2win.com/component/content/article/135

Would it be possible for us to just add links to our favorite extensions somewhere on your site?

That way we don't have to send you actual files and you could look at them, say, from most popular or most important first.

Today, this is not possible - this is a html file that I manage manually.
