Virtuemart on Slave Site Posted by naturalplushtd - 2009/04/16 00:50
Hi
I have got a slave site working with Joomla but when I attempt to reinstall extension for Viruemart and go to the admin page http://slave1.eshoppingltd.com/administrator/index2.php?option=com_virtuemart I get "You do not have permission to view module"
How do I get round this? Also where are the slave files located if I were to manually attempt to install a module plugin?
Thanks
Jason

Dear Jason, I have tried to find this error message everywhere in Joomla and VirtueMart and I have not found it. Would you please tell me which extension for VirtueMart you have tried to install. Also give me the URL where I can download it to try reproducing what you have described

I am having the same problem in the admin section. I click on the Virtuemart component of the slave site and get the error.

ERROR

You do not have permission to access the requested module.
