Jms Creates extrange code in my documents

Posted by ticasistencia - 2013/05/28 22:26

After the creation on the subdomain, when i work on any file or text it creates a lot of symbols /////// when i work on slave one css file is now 36 mb long and when i define a class in html always puts / and / between the classes and in the case of url it creates at least 1000 ///

Sorry, this is not clear.

Is this in the URL that you have such ////

Where are located those /////
can you provide a screenshot to illustrate that

Is this file that you see via FTP tool or SSH or ??????
