How to copy user accounts on slave sites

Posted by skouf - 2013/08/06 16:38

Hi

A have a simple question : I created a new user on my master site. I want this user to access on every slave sites I already created.

How to proceed ? Do I need something special ?

Thanks !

You need to share the users between the websites.

This operation is decided when you create the slave site.
See the tutorial video 16 that show how to do that between slave sites.
https://www.jms2win.com/en/tutorial#jms12x-16

If you are using a JMS 1.3.x, see also the rules present templates menu.
Some sample rules for the sharing of the users with the master are shareMasterXXXXX

Hi

Thanks ! It helps me a lot and it's working fine now.
