Question about Fresh Slave

Posted by iage - 2013/09/16 09:38

Hello,

I'm not sure if I understand correctly: Can I create a fresh slave (empty slave without content) and still share the DB, Users, Components and Plugins of the master?

Kind regards

-Stephan

NO

The sharing require that you replicate the website and that each table is either copied or shared.
You need to have a consistency in the website and that all IDs are unique and have a unique meaning.

So you have to replicate the website that guarantee this consistency with all the IDs present in the DB and allow sharing them.
