Admin panel not shown in slave site

Posted by abhijoom000 - 2014/02/06 00:30

---

once i will complete my migration then all is good but when i will open administrator of slave site then it's shows Fatal error: Class 'systemHelper' not found in /home/hso2/public_html/administrator/components/com_zoo/framework/classes/app.php on line 170.

To fix this issue i was disabled zoo component then my administrator open but in future case when i will install zoo component then it shows error again..so how to fix this issue.

Did you installed the patches for Yoothemes.
Zoo is an extension from Yoothemes and there are bugs in their WARP library that must be fixed in each extension and templates distributed by Yoothemes.
