Kunena moderator issue after migration

Posted by abhijoom000 - 2014/04/16 20:03

All users are able to edit all profiles – I turned off the ability because I could not give permission ONLY to the publisher (administrator).means when new member are register and then login in kunena forum than new member treated as a moderator(It edit to other user profile also). All users behave like a Administrator Rights.so please tell me how could we change moderator to normal user which edit only own profile not other. Is There any reply to this question .pleae giv me the solution of above question.

Thanx

Can you precise which version of Kunena you are using and the Joomla version that you are using.

We never had report on such kind of issue and we don't know the reason.
In the title, you mentioned and issue after Migration.

Can you explain what you migrate and how.
Perhaps that will help us understanding where the problem comes from.

If now, you want that we have a look directly on your environment and potentially debug this strange behavior on your environment, this is still possible with our billable support that you can order at https://www.jms2win.com/en/joomla-multisite?page=shop.product_details&flypage=flypage_multisites.tpl&product_id=35&category_id=1
