Store Locator Component Share Patch?

Posted by eclipsem - 2016/03/10 15:20

We have a "Store Locator" component that we want the slave sites to only share from the master site. I know there is patch yet from you tools list. How can we make this happen. Is there instructions on creating patches?

If you want that we have a look to add the sharing on "Store Locator" extension, please send us the extension in the attachement of an email and we will do the review of it.
Mention in the email for which version of Joomla you would like to have the review for the sharing of the extension.
See the "contact us" for the email address.
